Palm Casual Patio Layout Measurement Grid

Blank planning worksheet — use your own measurements and test the taped layout in your own space.

Scale: 1 square = _____

Sketch key: draw the patio edge, furniture footprints and clear walking path. Mark columns/obstacles, a fixed grill and the full door-swing arc.

Piece or area	Width	Depth	Notes
Patio or lanai overall space			
Columns, fixed grill and other obstacles			Distance from walls or edges
Sofa, sectional or seating group footprint			
Dining table footprint			
Coffee table, ottoman or side table			
Clear walking path			Walk it while carrying something
Door, screen door, gate or storage-bench swing			Mark the full swing arc
Dining chairs pulled back			Test each seat as if someone is standing up

After taping the outlines, walk the routes, open the doors and pull the chairs back. Photograph the result and bring your notes to a Palm Casual showroom to discuss the pieces you want to see.
